

# Table of Contents

## 1. Project Overview

- 1.1 About GA HireSync
- 1.2 Purpose and Goals of the Application
- 1.3 Problem it Solves

## 2. Technologies Used

- 2.1 Backend (Django)
- 2.2 Frontend (React JS)
- 2.3 Database (PostgreSQL)
- 2.4 Message Broker (RabbitMQ)

## 3. Features

- 3.1 Key Modules and Capabilities

## 4. Roles and Permissions

- 4.1 Agency Manager
- 4.2 Agency Recruiter
- 4.3 Client
- 4.4 Interviewer
- 4.5 Candidate
- 4.6 Accountant
- 4.7 Admin

## 5. Installation and Setup

- 5.1 Prerequisites (Node.js, Python)
- 5.2 Cloning and Installing Dependencies
- 5.3 Handle Environmental Variables
- 5.4 Database Setup and Migrations

## 6. Architecture

- 6.1 Flow of GA HireSync
- 6.2 Backend Architecture
  - 6.2.1 Database Schema
  - 6.2.2 Relationships Between Models
- 6.3 Frontend Architecture

- 6.4 Naming Conventions
- 6.5 Folder Structures (Backend + Frontend)

## **7. API Documentation**

- 7.1 List of API Endpoints
- 7.2 Sample Requests/Responses
- 7.3 API Rules and Error Handling
- 7.4 Authentication (JWT)

## **8. Application Flow (Detailed)**
